

Call for Viewpoints Articles

SEKE vs. Big Data

Although there are many interesting new approaches and techniques in software engineering and knowledge engineering, it is as yet unclear how SEKE can fruitfully incorporate recent research advances in Big Data. Therefore, viewpoints articles are solicited to discuss this issue. One can discuss emerging research, give examples of happy marriage of SEKE and Big Data, and also provide horror stories of unfruitful application of Big Data to SEKE or vice versa.

SEKE2015 authors are invited to submit a double-column single page viewpoints article to SEKE2015. To submit, please go to SEKE's EasyChair website to submit paper and select the track "SEKE vs. Big Data". The deadline for submission is June 1, 2015.

Selected viewpoints articles will be edited together into a panel session description. Authors of selected viewpoints articles will be invited to be panelist for the panel session "SEKE vs. Big Data".
