

# CALL FOR PAPERS

## Journal of Visual Language and Computing

<http://ksiresearch.org/jvlc/>

An Open Access Journal without access fee for both authors and readers published by

KSI Research Inc., 156 Park Square Lane, Pittsburgh, PA 15238 USA

E-mail: [jvlc@ksiresearch.org](mailto:jvlc@ksiresearch.org)

**Scope:** The Journal of Visual Language and Computing (JVLC) is intended to be a forum for researchers, practitioners and developers to exchange ideas and research results, for the advancement of visual languages, visual computing, visual modeling and sentient multimedia systems. The success of visual languages especially iconic languages is evident to everyone because most smart phones these days use iconic languages to communicate with the end user. Ironically the success of visual languages in practice has led to doubt and uncertainty about the future of visual languages research. However the advances in visual computing, visual modeling and sentient systems can motivate more research on visual languages, both at the practical level and at the theoretical level.

Visual computing is concerned with the computational process to visualize complex systems. Visual modeling refers to the theory and practice of modeling and simulation. Sentient systems are distributed systems capable of actively interacting with the environment by gathering, processing, interpreting, storing and retrieving multimedia information originated from sensors, robots, actuators, websites and other information sources. In order for sentient systems to function efficiently and effectively, visual languages, visual computing and visual modeling may play an important role.

**Types of Papers:** JVLC publishes research papers, state-of-the-art surveys, review articles and monographs based upon doctoral dissertation in the areas of visual languages, visual computing, visual modeling, sentient multimedia systems, distributed multimedia systems, sensor networks, multimedia interfaces, visual communication, multi-media communications, cognitive aspects of sensor-based systems. Papers are also welcome to report on actual use, experience, transferred technologies in sentient multimedia systems and applications. Timely research notes not to exceed ten pages and viewpoint articles, book reviews and tool reviews, not to exceed three pages, can also be submitted to JVLC.

**Manuscript Preparation:** Manuscripts shall be submitted electronically to JVLC. Original papers only will be considered. Manuscripts should follow the double-column format and be submitted in the form of a pdf file. Page 1 should contain the article title, author(s), and affiliation(s); the name and complete mailing address of the person to whom correspondence should be sent, and a short abstract (100-150 words). Any footnotes to the title (indicated by \*, +, etc.) should be placed at the bottom of page 1.

Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a course of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in JVLC represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

**How to Submit:** If you are submitting a paper, you can first go to <http://ksiresearch.org/jvlc/jvedsubmit.html> to enter information about the paper. You will be assigned a number such as 012. You can then use ftp client to upload paper012 through <ftp.ipage.com>, name: jvlc and password: Covid-19#

**Editor-in-Chief:**

Shi-Kuo Chang, University of Pittsburgh, USA

**Co-Editors-in-Chief:**

Gennaro Costagliola, University of Salerno, Italy

Paolo Nesi, University of Florence, Italy

Gem Stapleton, University of Kent, UK

Franklyn Turbak, Wellesley College, USA
